Thermo Scientific Multidrop Microplate Dispensers provide a cost-effective method of filling a wide range of microplate types. The Multidrop range can dispense reagents, buffers, media and live cells fast - 5µl into a 384-well plate in just 5 seconds. By providing day-to-day reliability and precision, the occurrence of human error and assay variation is reduced. Ideal for volumes over 20 µl, the Multidrop 384 dispenses volumes between 5-395 µl into 96- and 384-well microplates, whereas the Multidrop DW has been developed to dispense higher volumes, between 20-995 µl, into DW plates, standard 96-well plates and tubes in 96-well racks. Dispensing into 6-1536-well plates, it has the capability to dispense at volumes up to 2500 µl and go as low as 0.5 µl. Enjoy effortless dispensing every day with Thermo Scientific Multidrop Dispensers - find out more about our special prices today by visiting <http://www.thermo.com/multidrop>.
